

PerformCARE®		Policy and Procedure
Name of Policy:	Initial & Re-Authorization Requirements for Community Residential Rehabilitation - Host Home (CRR-HH) and Community Residential Rehabilitation – Host Home - Intensive Treatment Program (CRR-HH-ITP)	
Policy Number:	CM-CAS-053	
Contracts:	<input checked="" type="checkbox"/> All counties <input type="checkbox"/> Capital Area <input type="checkbox"/> Franklin / Fulton	
Primary Stakeholder:	Clinical Department	
Related Stakeholder(s):	Provider Network Operations	
Applies to:	Providers	
Original Effective Date:	02/15/22	
Last Revision Date:	02/15/22	
Last Review Date:	02/15/22	
Next Review Date:	02/15/23	

Policy: Establishes protocols for the initial and re-authorization of Community Residential Rehabilitation - Host Home (CRR-HH) and Community Residential Rehabilitation – Host Home - Intensive Treatment Program (CRR-HH-ITP).

Purpose: To assure that network providers meet requirements for requesting initial and re-authorization of Community Residential Rehabilitation - Host Home and Community Residential Rehabilitation – Host Home - Intensive Treatment Program.

Definitions: **CRR-HH:** Community Residential Rehabilitation – Host Home is a mental health treatment provided in a family dwelling for Members whose behavioral health needs prevent them from being treated in the home setting; however, they can benefit from treatment in a natural home setting within the community.
CRR-HH - (ITP): Community Residential Rehabilitation – Host Home - Intensive Treatment Program is a short-term mental health treatment that includes evidence based treatment and is designed to serve a Member in a family like setting. A Member receiving treatment in ITP typically has severe emotional and behavioral health needs that prevent effective treatment from occurring within the home; however, the Member is likely to benefit from treatment in a natural home like setting within the community.
 Note: Applies to Capital Counties only.
IBHS: Intensive Behavioral Health Services, which are an array of therapeutic interventions provided to a child, youth, or young adult in the home, school, or other community setting.

ISPT: The Interagency Service Planning Team is comprised of the child/adolescent Member, family or legal guardian, significant community support persons, treating professionals, school personnel, CASSP, County Children's Mental Health designee, Evaluator or other psychologist or psychiatrist involved with the Member, vocational and educational specialists, the PerformCare Clinical Care Manager (CCM), and others identified as central to the successful treatment for the child/adolescent. This includes, but is not limited to, Children, Youth and Families, Juvenile Probation, and county case management.

Targeted Case Management: Includes Intensive Case Management, Resource Coordination and Blended Case Management.

Acronyms:

BPE: Best Practice Evaluation

CCM: Clinical Care Manager

CYS: Children and Youth Services

ITP: Individual Treatment Plan

JPO: Juvenile Probation Office

ID: Intellectual Disability

ITP: Individual Treatment Plan

ORP: Ordering, Referring, Prescribing

TCM: Targeted Case Manager

- Procedure:**
1. Initial Requests for CRR-HH or CRR-HH-ITP:
 - 1.1. PerformCare will follow OMHSAS-21-04 Bulletin Procedure for Providing a Specialized Behavioral Health Treatment Program in Community Residential Rehabilitation Host Home Settings. Below are the requirements for CRR-HH and CRR-HH-ITP:
 - 1.1.1. Member is under the age of 18.
 - 1.1.2. Cannot be an emancipated minor.
 - 1.1.3. Have a diagnosis of a behavioral health disorder that is included in the current version of the Diagnostic and Statistical Manual of Mental Disorders.
 - 1.1.4. A psychological or psychiatric evaluation by an ORP-enrolled prescriber. (PerformCare requires a BPE for a psychological evaluation) completed within 60 days of the submission of the request. The evaluation must substantiate the need for the Member to receive a specialized behavioral health treatment program in the host home setting and include an

- assessment of Member strengths and needs across home and community settings and, if applicable, in school settings.
- 1.1.5. An individual treatment plan, which includes the services and supports that, will be provided as part of the specialized behavioral health treatment program and the measurable goals for the Member.
 - 1.1.6. Documentation of an ISPT/treatment team meeting that was held within 60 days of the submission of the request. The treatment team meeting must include the provider, the legal guardian or caregiver of the child or youth, the Member if 14 or older and, if appropriate, the Member that is under age 14. Participation or input from the school and any other systems or services that are serving the child or youth is also required in preparation for or as part of the treatment team meeting.
 - 1.1.7. A summary of all services and supports the child or youth receives.
 - 1.1.8. The prescriber is required to follow ORP enrollment guidelines.
 - 1.2. The BPE or psychiatric evaluation must be submitted to PerformCare within ten (10) calendar days of completion.
 - 1.3. Within two (2) business days of receiving a CRR-HH recommendation, PerformCare will begin to schedule an ISPT meeting at a date and time most convenient for the Member/Family/Guardian. The PerformCare CCM will facilitate this meeting.
 - 1.3.1. The ISPT meeting must include the PerformCare Care Manager, County Mental Health designee, the provider, the legal guardian or caregiver of the member, the member if 14 or older and, if appropriate, the member (if under 14). Participation or input from the school and any other systems involved with the Member/Family (TCM, CYS, JPO, ID), community and natural supports.
 - 1.3.2. If the Member has an active TCM, that individual is responsible for scheduling and facilitating the ISPT meeting for initial CRR-HH.
 - 1.3.2.1. Note: TCM is required to invite the PerformCare CCM and CCM participation in initial ISPT is required.
 - 1.4. Following the ISPT meeting, a valid request will be submitted within (4) calendar days.

- 1.4.1. If the Member has an active TCM, that individual is responsible for submitting a valid request to PerformCare.
- 1.4.2. In the absence of a TCM, the PerformCare CCM who facilitated the ISPT meeting will complete a valid request.
- 1.4.3. A valid request consists of:
 - 1.4.3.1. PerformCare Child/Adolescent Services. Request Submission Sheet.
 - 1.4.3.2. BPE or psychiatric evaluation.
 - 1.4.3.3. ISPT Sign-In sheet.
 - 1.4.3.4. ISPT Summary (required).
 - 1.4.3.5. ITP.
- 1.5. PerformCare will make a medical necessity decision according to *CM-013 Approval/Denial Process and Notification*.
- 1.6. If approved, PerformCare will send referrals to CRR-HH providers.
 - 1.6.1. If the Member has an active TCM, that individual is responsible for sending referrals to all clinically appropriate CRR-HH providers.
 - 1.6.2. CRR-ITP referrals are the sole responsibility of PerformCare.
- 1.7. Once received, CRR-HH/CRR-HH-ITP providers have seven (7) calendar days to review the referral information, including interviewing the youth, and determine if the Member is appropriate for their program.
 - 1.7.1. If declining the referral, the provider is responsible for notifying PerformCare (or the TCM, if applicable) and provide a clear detailed rationale for not accepting.
 - 1.7.2. If accepting the referral, the accepting provider will notify PerformCare, (or the TCM, if applicable) and the Member/Family/Guardian of the acceptance as well as proposed admission date.
 - 1.7.3. If a decision cannot be made in seven (7) calendar days, the CRR-HH/CRR-HH-ITP provider should contact PerformCare (or TCM, if applicable) to provide an update. An update should also be provided every seven (7)-calendar days thereafter until a decision is made.
- 1.8. The referral process (Steps 1.6, 1.7) continues until a CRR-HH/CRR-HH-ITP provider admits a Member to CRR-HH/CRR-HH-ITP.
 - 1.8.1. The maximum duration of the referral process is four (4)-months from the BPE date. If additional

- time is needed, a new BPE, ISPT, and valid request is required.
- 1.9. On the date of admission, the accepting CRR-HH/CRR-HH-ITP provider will notify PerformCare at which time an authorization will be generated from the date of admission.
 - 1.9.1. Initial CRR-HH = maximum of 4-months.
 - 1.9.2. Initial CRR-HH (ITP) = maximum of 6-months.
 - 1.10. Monthly team meetings are required once services are initiated.
 - 1.10.1. PerformCare CCM is required to be invited to all monthly CRR-HH/CRR-HH-ITP meetings.
 2. Re-authorization Requests:
 - 2.1. For continuation of CRR-HH or CRR-HH-ITP, a Member must receive a new BPE from an ORP-enrolled prescriber and follow requirements under 1.1.
 - 2.1.1. Note: CRR-HH-ITP is permitted to submit only one re-authorization request following an initial approval and admission per approved service description requirements. CRR-HH-ITP is a short term and time limited program. PerformCare will consider exceptions on a case-by-case basis in collaboration with the treatment team per the unique needs of a Member that may need additional time in the CRR-ITP.
 - 2.2. The current treating provider will update the Member's ITP.
 - 2.3. An updated ISPT meeting is also required.
 - 2.4. The current treating provider is responsible for submitting a valid re-authorization request to PerformCare within (60) calendar days prior to the end of the current authorization period to prevent an expired authorization.
 - 2.4.1. The valid request must include:
 - 2.4.1.1. PerformCare Child/Adolescent Services Request Submission Sheet.
 - 2.4.1.2. BPE.
 - 2.4.1.3. ISPT Sign-In sheet.
 - 2.4.1.4. ISPT Summary (required).
 - 2.4.1.5. Updated ITP (within 30 days).
 - 2.5. PerformCare will make a medical necessity decision according to *CM-013 Approval/Denial Process and Notification*.
 - 2.6. A new authorization will be generated if continued services are approved.
 - 2.6.1. CRR-HH = maximum of 4 months.

- 2.6.2. CRR-HH ITP = maximum of 3 months (one time only).
3. Discharge Process:
 - 3.1. Within (45) calendar days prior to the date of discharge, a pre-discharge planning treatment team meeting is required, and all members of the treatment team are required to be invited.
 - 3.2. The CRR-HH or CRR-HH-ITP provider calls and notifies the PerformCare CCM on the date of discharge.
 - 3.3. Within (45) calendar days after the date of discharge, the current treating provider must submit a Discharge Summary Form, and a Child/Adolescent Services Request Submission Sheet to PerformCare.
 - 3.3.1. A copy of the Discharge Summary Form must be provided to the Member/Family/Guardian and other team members.
4. All providers and prescribers are required to follow PerformCare's OMHSAS approved medical necessity guidelines per attachment 5 of this P&P.

PerformCare Medical Necessity Guidelines for Community Residential Rehabilitation-Host Home

This document was developed with input from various stakeholders (e.g., PerformCare Executive Management; Network Evaluators; Primary Contractors; County Representatives; PerformCare Provider Advisory Council). The objective is to provide critical information regarding Medical Necessity Guidelines (MNG) and outline admission and continued care criterion, as well as discharge indicators for treatment occurring within a Community Residential Rehabilitation–Host Home (CRR-HH).

CRR-HH is a type of mental health treatment that is provided in a family like setting and is most appropriate for Members whose behavioral health needs prevent effective treatment from occurring within the family home or current living arrangement (e.g., guardian). Although the family home may not be conducive to treatment efforts, the Member can likely benefit from treatment within the community. Treatment is usually provided utilizing various therapeutic modalities (e.g., individual therapy; family therapy; behavioral reinforcement; environmental interventions) and can also include evidence based treatments.

Treatment occurring within a CRR-HH relies heavily on participation from the Member and parent/guardian/discharge resource as they are integral and important members of the treatment team. Member specific needs are identified and clearly defined, ongoing assessment of Member functional abilities occur, and effective interventions are developed. Included in this is the teaching of interventions and skills to the Member and parent/guardian/discharge resource in order to allow for continued skill development upon discharge from CRR-HH.

Admission Guidelines for CRR-HH

Must meet ALL of the following:

1. Member is under the age of 18 and is not an emancipated minor; and,
2. Member must have a diagnosis of a serious behavioral health disorder that is included in the most current version of the Diagnostic and Statistical Manual of Mental Disorders (DSM) or International Classification of Diseases (ICD); and,
 - a. Intellectual Disability or Substance Use Disorder cannot be primary or standalone diagnoses.
 - i. Member should be able to meaningfully participate in therapy.
3. A Best Practice Evaluation (BPE) or a psychiatric evaluation has been completed and recommends this level of treatment; and,
 - a. The strengths based BPE must clearly document and specify the significant clinical need, behaviors, and symptoms that require 24-hour supervision and treatment outside of the home.
 - b. The BPE must detail level of functioning in the home, describe Member functioning in other realms (e.g., community; adaptive; behavioral; school; social) and provide a cohesive rationale as to why treatment cannot occur within the family home or current living arrangement (e.g., guardian).
 - c. Other types of treatment such as FBMHS, IBHS, or evidence based treatments are either not appropriate for the clinical presentation or have not demonstrated appreciable treatment gains that would allow the Member to benefit from treatment within the home.
4. There is an identified discharge resource; and,
 - a. Discharge resource must agree to meaningfully and collaboratively participate in treatment, treatment planning, therapeutic interventions, and discharge planning, as defined within the Individual Treatment Plan (ITP) and the CRR-HH service description.
 - b. Should the Member be in the custody of Children and Youth Services (CYS) the treatment goal for this service should be clearly defined within relevant documents, such as the ITP.
5. Member behaviors are of such significance that there is a negative impact on family relationships and dynamics, and behaviors interrupt the ability to maximize Member and family functioning; and,
6. Although the intensity of the behaviors are not able to be managed in the current home setting, the Member can function safely within the community, even if behavioral support is needed; and,
7. The behaviors and/or symptoms reported are likely to persist without this level of treatment; and,
8. The behavioral health needs of the Member do not require a more intensive type of treatment; and,
9. Member is not an imminent risk to self or others, or if a lesser degree of risk is present a proactive safety plan has been developed.

10. The Member and parent/guardian/discharge resource are involved in the treatment planning process and agreeable to participate in CRR Host Home treatment;

Continued Care Guidelines for CRR-HH

Must meet ALL of the following:

1. Member is under the age of 18 and is not an emancipated minor; and,
2. Continued diagnosis of a serious behavioral health disorder that is included in the most current version of the DSM or ICD; and,
 - a. Intellectual Disability or Substance Use Disorder cannot be primary or standalone diagnoses.
 - i. Member should be able to meaningfully participate in therapy.
3. A BPE or a psychiatric evaluation has been completed and recommends this level of treatment; and,
 - a. The strengths based BPE clearly documents and specifies the significant clinical need, behaviors, and symptoms that persist and continue to require 24-hour supervision and treatment outside of the home.
 - b. The BPE must describe Member functioning in various realms, including in the CRR-HH, and provide a cohesive rationale as to why treatment within the family home/discharge resource is contraindicated.
 - c. The BPE should review treatment efforts within the CRR-HH noting effective interventions, identified barriers to treatment that necessitate continued care, plans to address these barriers, and status of the transfer of skills to parent/guardian/discharge resource.
 - d. Another type of treatment such as FBMHS, IBHS, or an evidence based treatment cannot meet the need of the Member within the family home/discharge resource.
4. There is an identified discharge resource; and,
 - a. Discharge resource must meaningfully and collaboratively participate in treatment, treatment planning, therapeutic interventions, and discharge planning, as defined within the ITP and the CRR-HH service description.
 - b. Should the Member be in the custody of CYS the treatment goal for this service should be clearly defined within relevant documents, such as the ITP.
 - c. The CRR-HH documents at least weekly efforts to engage the parent/guardian/discharge resource in the treatment process.
5. Although the need for skill development in various functional areas remains, the Member has shown progress in identified treatment goal areas and/or there is a clinical determination that the Member would continue to substantially benefit from treatment in the CRR-HH, and behaviors would persist or worsen without CRR-HH treatment; and,
 - a. The treatment team has identified new or high risk behaviors or symptoms during the course of treatment within the CRR-HH that can only be treated in CRR-HH.

- b. Behaviors continue at a significant level and cannot be effectively treated in the family home/discharge resource at this time.
 - c. Parent/guardian/discharge resource remains involved in Member treatment and discharge planning.
- 6. The Member remains able to function safely within the community, even if behavioral support is needed; and,
- 7. There is a viable discharge plan and target discharge date that is reviewed and revised, as needed, but on a regular basis, and these discharge discussions are documented; and,
- 8. The behavioral health needs of the Member do not require a more intensive type of treatment; and,
- 9. Member is not an imminent risk to self or others, or if a lesser degree of risk is present a proactive safety plan has been developed.
- 10. The Member and parent/guardian/discharge resource are involved in the treatment planning process and agreeable to participate in CRR Host Home treatment;

Discharge Indicators for CRR-HH

- 1. The Member no longer needs the CRR-HH level of care due to:
 - a. Member has made treatment progress and continued care criteria are no longer met; or,
 - b. The Member requires a more restrictive type of treatment due to continued or worsening behavioral health needs; or,
 - c. There is a sustained and prolonged lack of progress that has been addressed by the treatment team (e.g., a variety of wide-ranging and different types of therapeutic modalities has been attempted; treatment team meetings to address/resolve identified areas of concern have occurred; several types of treatment have been tried; etc.), there is no reasonable expectation that the Member would benefit from remaining within the CRR-HH, and other types of treatment that may better meet Member need are being pursued.
