

Residential Drug and Alcohol treatment facilities –

PerformCare received information from DDAP that we wanted to share with you. See below and let us know if you have any questions.

*Per DDAP -*

**We are reminding residential drug and alcohol treatment facilities of their ability to use flex beds to meet capacity needs during COVID-19 mitigation.**

*Using this flex bed approach allows a facility already licensed to provide both residential detoxification and residential rehabilitation at the same location to utilize empty beds in one activity to conduct services provided in the other activity. For personnel purposes, facilities approved for flex bed may also utilize counselors as primary care staff within their detox unit when utilizing additional detox beds.*

*The attached documents can also be found on our website:*
